Test Case Design

Automation Testing

Manual test

## Certifications

ISTQB® Certified Tester Foundation Level (CTFL)

# camilo posada

QA Automation Engineer

Medellín, Antioquia, Colombia

## Extracto

Detail-oriented Test Automation Engineer with proven experience in both manual and automated software testing. Skilled in test design, test execution, and test optimization, with hands-on expertise in automation frameworks such as Cypress, Selenium, and Playwright using Java and JavaScript. Experienced in end-to-end manual testing, including developing detailed test cases, performing exploratory and regression testing, as well as test documentation and defect reporting. A passionate advocate for automating lengthy and repetitive processes to accelerate deployment cycles and improve team productivity. Skilled in API (REST and GraphQL) and database testing, with a strong understanding of the complete software development and testing lifecycle. Passionate about continuous learning, process improvement, and collaborating with teams to ensure delivery of high-quality and reliable software.

## Experiencia

### EPAM Systems

Senior Software Test Automaiton Engineer

febrero de 2025 - Present (7 meses)

#### Responsabilities

- Test Automation
- Test Scripts maintenance
- Improve test quality

### Intellias

Senior AQA tester

junio de 2023 - febrero de 2025 (1 año 9 meses)

#### Fuel Management Software Client

Worked as a QA Engineer key member of the Fuel Management Software team for an industry-leading global energy solutions provider, contributed to product quality assurance through both manual and automated testing. Developed and maintained automated test scripts using Katalon, Selenium,

Playwright (Java), and TestNG. Designed, executed, and documented comprehensive manual test cases; managed defect reporting and regression testing to support software releases. Maintained traceability between requirements and test cases using Xray in Jira. Collaborated closely with developers and stakeholders to optimize testing processes, and drive continuous improvement in QA practices.

Key Skills:

Manual & Automated Testing | Katalon | Selenium | Playwright | Java | TestNG  
| Jira/Xray | GraphQL | QA Process Improvement

Perficient Latin America

QA Automation Engineer

mayo de 2022 - junio de 2023 (1 año 2 meses)

Medellín, Antioquia, Colombia

QA Engineer for a Construction Management Software client

Worked on a leading construction management platform designed for commercial subcontractors, focusing on enhancing document workflows and project visibility. Designed and executed automated test scripts using Cypress and Playwright (JavaScript); managed the automation pipeline with GitHub Actions. Developed and documented manual test cases from requirements and user stories, performing extensive manual testing (exploratory, functional, regression) and API/GraphQL testing. Tracked and reported defects via Jira/Xray, and collaborated closely with developers and stakeholders to ensure comprehensive test coverage and optimal product quality.

Key Skills:

Cypress | Playwright | JavaScript | GitHub Actions | Manual & Automated Testing | API/GraphQL Testing | Jira/Xray | Test Documentation & Process Improvement

Intertec International

QA Automation Engineer

julio de 2021 - abril de 2022 (10 meses)

Medellín, Antioquia, Colombia

QA Engineer for a Vehicle Remarketing Platform client

Contributed to the quality assurance of an advanced vehicle remarketing platform supporting seamless auction and wholesale transactions for automotive dealers and consumers. Rapidly adapted to a Python-based automation framework, designing and executing automated test scripts with

Selenium using Python for functional, end-to-end, and regression testing. Developed comprehensive test plans and manual test cases, ensuring robust system validation and efficient release cycles. Additionally, proposed and implemented a JavaScript-based API testing framework using Playwright, significantly reducing test execution time and enhancing testing efficiency. Collaborated closely with cross-functional teams to align QA efforts with evolving project goals in a dynamic agile environment.

#### Key Skills:

Python | Playwright | Test Automation | Test Case Design | Manual & Automated Testing | API/REST Testing | Framework Development | Rapid Learning & Adaptability

### Globant

#### Test Automation Engineer

septiembre de 2020 - julio de 2021 (11 meses)

QA Engineer for Customer Support SaaS Platform client

Contributed to the quality assurance of a market-leading customer experience SaaS platform by enhancing automation coverage and improving product quality. Quickly adapted to an established Ruby-based automation framework, developing and integrating new automated test cases. participated in the migration of legacy tests to a modern Cypress-based framework. Designed comprehensive manual and automated test cases, performed requirement traceability using a matrix, and identified automation opportunities. Improved test stability and efficiency through ongoing review, refactoring, and debugging.

#### Key Skills:

Cypress | Ruby | Selenium | API Testing | Test Case Design | Manual & Automated Testing | Test Migration | Requirement Traceability

### Sofka Technologies

#### Automation Engineer

julio de 2018 - agosto de 2020 (2 años 2 meses)

Medellin, Colombia

QA Automation Engineer – Pensions Management Software client

Began professional automation and testing career contributing to a pensions management platform that safeguards retirement assets. After completing an intensive in-house bootcamp, designed and developed new automated test cases using a Behavior-Driven Development (BDD) framework (Java,

Cucumber, Selenium). Collaborated with the QA team to architect and implement a scalable automation framework, increasing testing efficiency across the organization. Analyzed requirements and created comprehensive manual test cases, maintaining traceability between cases and requirements to ensure complete coverage and support the transition from manual to automated testing. Involved in API and database testing, with experience in CI/CD using Jenkins.

#### Key Skills:

Java | Cucumber | Selenium | BDD Framework | Manual & Automated Testing | Jenkins | CI/CD | API & Database Testing | Test Case Design | Requirement Traceability | Framework Design

#### Konecta

Analista desarrollador

septiembre de 2017 - junio de 2018 (10 meses)

Área metropolitana de Medellín
